

# IDR15 Series

## 15 Watts

- Slim design
- Output adjustment
- DC OK LED and DC Low LED
- Operating temperature -25 to 70°C
- TS35/7.5 and TS35/15 DIN rail
- 5 Year warranty

The IDR15 series of DIN rail power supplies provide 15W of power in a slim 22.5mm package. The units are fully featured with built in EMI filter and over voltage, over current and short circuit protections. Outputs available; 12 or 24V and every unit comes with a FiDUS 5 year warranty.

**Dimensions:**

0.89 x 3.74 x 4.25" (22.5 x 95.0 x 108.0mm)

### Models & Ratings

INSTALLATION ADVICE PG4

Model Number	Output Power	Output Voltage	Output Current	Efficiency <sup>(1)</sup>
IDR1512	15W	12V	1.2A	80%
IDR1524	15W	24V	0.65A	83%

### Notes

1. Efficiency at 100% load, 25°C, 230VAC input.

### Key specifications

Parameter	Minimum	Typical	Maximum	Units	Notes & Conditions
AC Input range	90		264	VAC	Derates from 110VAC to 90VAC at 1% per VAC
Operating temperature	-25		70	°C	Derate linearly 2.6% per °C from 55 to 70°C 240VAC. Derate linearly 2% per °C from 50 to 70°C 110VAC
Efficiency	See ratings table above				
Dimensions	0.89 x 3.74 x 4.25" (22.5 x 95.0 x 108.0mm)				
EMC	EN55032 Level A conducted and radiated. EN61000-3 and EN61000-4, harmonics, flicker, Surge, EFT, ESD, conducted and radiated EN55024				
Safety	IEC60950-1, UL60950-1, CSA-C22.2 No.60950-1, CE, designed to meet UL508 and UL1310				

### Input

Parameter	Minimum	Typical	Maximum	Units	Notes & Conditions
AC Input range	90		264	VAC	Derates from 110VAC to 90VAC at 1% per VAC
AC Input Frequency	47		63	Hz	
Power factor					EN61000-3-2 class A compliant
On delay			0.1	s	Full load 115VAC
No load power consumption			1.7	W	At 230VAC
Input current (rms)		0.28		A	At 115VAC
		0.15			At 230VAC
Inrush current		30		A	115VAC cold start at 25°C. Inrush limiting circuit <sup>(2)</sup>
		60			230VAC cold start at 25°C. Inrush limiting circuit <sup>(2)</sup>

### Notes

2. Malfunction may occur if the input voltage is cycled repeatedly due to the inrush limiting circuit. Please avoid rapid, repeated power cycling.

## Output

Parameter	Minimum	Typical	Maximum	Units	Notes & Conditions
Output voltage adjustment	12V: 8-12.7V, 24V: 15-27V			V	Power output not to be exceeded
Setpoint accuracy			±1	%	
Line regulation			±1	%	100VAC-240VAC
Load regulation			±1	%	Min load to max
Minimum load	0			A	
Ripple & Noise	40		64	mV(Vp-p)	All models measured with 0.1uF ceramic and 47uF electrolytic capacitor and 20 MHz bandwidth.
Hold up time		20		ms	At full load, 115VAC
Overload protection		1.8 A / 0.9 A		A	Hiccup mode. 1.8A for 12V and 0.9A for 24V
Short circuit protection					Trip and restart. Automatic recovery
Overvoltage protection		18 / 30		V	Automatic recovery. 18V for 12V and 30V for 24V
Over Temp protection		100 ±10		°C	Trip and restart. Automatic recovery
DC LOW LED	DC LOW LED light will be ON when output voltage is below 85%(±2.5%), over voltage, over current, over temp and short circuit.				

## General

Parameter	Minimum	Typical	Maximum	Units	Notes & Conditions
Isolation: Input to Output	3000			VAC	
Input to Ground	1500			VAC	
Output to Ground	500			VAC	
Isolation resistance			100	MΩ	500VDC
Power density		1.06		W/in <sup>3</sup>	
MTBF		200		KHrs	As per MIL-HDBK-217F, 25°C, 220VAC
Weight		200		g	

## Environmental

Parameter	Minimum	Typical	Maximum	Units	Notes & Conditions
Operating temperature	-25		70	°C	Derate linearly 2.6% per °C from 55 to 70°C 240VAC. Derate linearly 2% per °C from 50 to 70°C
Storage temperature	-40		85	°C	Humidity 5-95% RH
Cooling					Natural convection
Humidity	20		95	% RH	Non condensing
Mounting orientation	Vertical only				

Derating curve

## EMC: Emissions

	Standard	Test level	Criteria	Notes & Conditions
Conducted	EN55032	A		
Radiated	EN55032	A		
Harmonic current	EN61000-3-2	Class A		Also, Class D compliant
Voltage flicker	EN61000-3-3			

## EMC: Immunity

	Standard	Test level	Criteria	Notes & Conditions
ESD	EN61000-4-2	2/3	A	Contact 4KV, Air 8KV
Radiated	EN61000-4-3	2	A	3V/M 80-1000MHz 80%AM 1KHz
EFT	EN61000-4-4	3	A	2KV at 5KHz 120sec
Surges	EN61000-4-5	Installation Class 3	A	Line to line 1KV, Line to PE 2KV
Conducted	EN61000-4-6	3	A	10V 0.15-80MHz, 80%AM 1KHz
Dips and Interruptions	EN61000-4-11		AAB	>100% dip, 30% dip and interruptions

## Safety Approvals

	Safety standard	Notes & Conditions
UL	UL60950-1	
CB	IEC60950-1	
CE		2011/65/EU RoHS Directive and 2006/95/EC Low voltage directive
Equipment protection class		Class I

## Mechanical Details

## Notes

1. All dimensions shown in millimetres (mm)
2. Tolerance:  $\pm 1$  mm

## Installation Advice

### Series Operation

Series connection is possible as per below diagrams. Current draw should be no higher than the lowest power unit

### Parallel Operation

Parallel operation is possible as per drawing. Only identical units can be used in this way. Do not mix powers or voltages.

Parallel operation is for redundancy only, not for increased load capability.

Select diodes with appropriate voltage drop ( $V_f$ ), output voltage ( $V_o$ ) and current capacity ( $I_o$ )

### Thermal Consideration

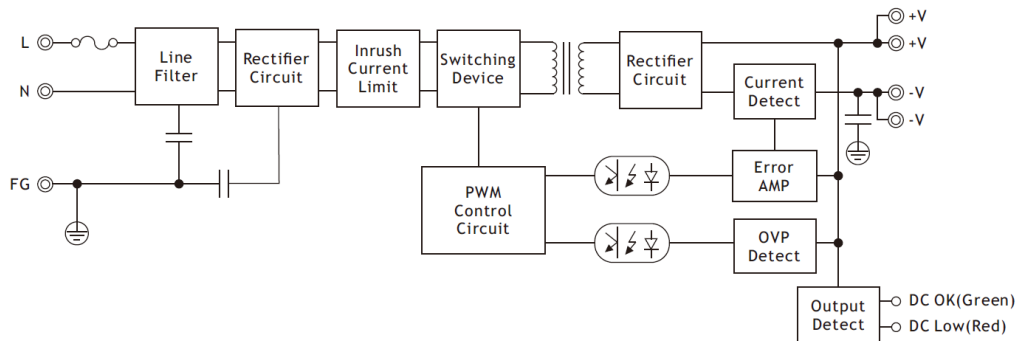

For best thermal performance allow for ventilation either side of the unit to neighbouring power supply units and above and below the unit as per diagram. Spacing can be reduced with forced air cooling.

### Notes

1. The earth terminal must always be connected for electrical safety and EMC compliance.
2. When using multiple units, be aware that the cumulative affect of EMC filter drain will increase earth leakage currents.

## Block Diagram

## DIN Rail mounting /removal

### Notes

1. The earth terminal must always be connected prior to use for electrical safety and EMC compliance.
2. Be cautious of falling debris –wire strands / swarf, as this will cause serious damage to the unit.
3. Suitable for TS35/7.5 and TS35/15 DIN rail.
4. Wire size accepted by terminals <math>< 2.5\text{mm}^2</math> (AWG12).
